Education

Whitman College, Walla Walla, WA Sept 2023 – May 2026
Bachelor of Arts in Computer Science, Honors, *summa cum laude* **Major GPA: 4.0**

Relevant Coursework: Software Design, Algorithm Design & Analysis, Data Structures, Computer Systems Programming, Senior Capstone Project

University College Dublin, Dublin, Ireland Sept 2022 – May 2023

Skills

- **Programming Languages:** Python, Java, JavaScript, HTML, CSS, C#
- **Tools:** Git, GitHub
- **Technical:** Object-Oriented Programming, Front-End Development, Back-End Development, Data Structures & Algorithms, Version Control, Unit Testing
- **Collaboration:** Collaborate effectively on software development teams; navigate organizational challenges to keep projects on track
- **Initiative:** Learn and apply unfamiliar technical tools quickly; organize and manage projects to meet deadlines
- **Communication:** Relay technical information clearly and concisely to non-technical stakeholders

Experience & Projects

Humanitarian Data Analysis – Independent Researcher Sept 2025 – May 2026
Whitman College, Walla Walla, WA

- Conducted faculty-supervised independent research analyzing and visualizing humanitarian and geographic data using Python, NumPy, and Pandas.
- Developed interactive visualizations with Plotly under the guidance of a faculty advisor, meeting weekly to discuss methods and design.

Community Resource Portal – Senior Capstone Project Sept 2025 – April 2026
Whitman College, Walla Walla, WA

- Worked in a team of four using Kanban to develop a full-stack web platform using Flask and Vue, collaborating with a local client to translate user requirements into functional software.
- Primarily focused on developing front-end logic to dynamically populate the interface from the back end and integrating the front-end and back-end components.
- Led task organization and coordinated team member contributions to ensure functionality and meet deadlines.

Motion Tracking Web Application – Research Assistant June – Aug 2025
Whitman College, Walla Walla, WA

- Awarded Sutherland Family Computer Science Summer Research Grant to develop a web-based motion tracking tool for the Whitman Theater Department.
- Coded application interface and logic using JavaScript and HTML to trigger QLab stage cues from real-time motion tracking data.
- Ensured accessibility and usability for non-technical theater staff by designing a simple interface following theatrical conventions.

Collaborative Research Project – Student Researcher Sept – Dec 2022
University College Dublin, Dublin, Ireland

- Participated in a five-person research team under a faculty advisor, assuming leadership responsibilities following organizational challenges and resolving conflicts to ensure timely completion of assigned tasks.
- Co-authored a research paper and presented findings to peers, communicating complex data analysis in accessible terms.
